RE: OLA Reference #: 9401873  
Hexcel Corp 205 Main Street Lodi

Dear Mr./Ms. Naughton,

This is in response to your firm's request for information pertaining to the above referenced site or subject.

The New Jersey Department of Environmental Protection Central File Unit maintains files for the Division of Publicly Funded Site Remediation, Division of Solid Waste Management, Wastewater Facilities Regulation Program (WFRP), and Water Supply Element. Please keep in mind that the Central Files for any of these programs are NOT all inclusive.

A search of these records shows that there is no information in the Central Files which pertains to your request.

The Central Files also house a collection of "General Municipality" files which contain information from the Water Enforcement Field offices for unpermitted facilities/incidents. The documents in these files do not have any permit numbers associated with them so they are categorized by location. These files MAY OR MAY NOT contain information related to your request.

If you wish to schedule an appointment or review the municipality file(s) for the site(s) you requested please contact my office at (609) 292-0400.

If you need any further assistance please feel free to call.

Sincerely,

Susan L. Carson  
Supervisor Central Files  
Bureau of Central Services &  
Property Management
